### **DETAILED ACTION**

1. This communication is responsive to Amendment filed 10/17/2007.
2. Claims 43-81 are pending in this application. Claims 43, 55, and 69 are independent claims. In Amendment, claims 1-42 are previously cancelled. This Office Action is made final.

#### ***Claim Rejections - 35 USC § 101***

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 43-81 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 43-81 cite a processor, medium, and system for performing structure multiplication in accordance with a mathematical algorithm. In order for claims to be statutory, claims must either include a practical/physical application. However, claims 43-81 merely disclose steps/components for performing structure multiplication without further disclosing a practical/physical application or a useful and tangible result since the claims appear to preempt every substantial practical application of the idea embodied by the claim and there is no cited limitation in the claims that breathes sufficient life and meaning into the preamble so as to limit it to a particular practical application rather than being so broad and sweeping as to cover every substantial practical application of the idea embodied therein. Further, claims 55-68 are software per se since the medium

comprising a processor is embodied in software and the medium can be data signal medium as cited in page 15 lines 15-18 of the original specification. Therefore, claims 43-81 are directed to non-statutory subject matter.

***Response to Arguments***

5. Applicant's arguments filed 10/17/2007 have been fully considered but they are not persuasive.

a. The applicant argues in page 10 first paragraph for claims rejected under 35 U.S.C. 101 that the claims recited a structure for increasing multiplication efficiency. Further in second paragraph, the applicant argues that the useful application of the claims is to enhance the performance of elliptic curve cryptosystems and other systems as cited in the specification. The claims also implements in a tangible hardware and generates physical signals and stored in a register. With respect to claims 55-68, the applicant argues the software is embodied in the storage medium in page 11.

The examiner respectfully submits that current language of claims 43-81 do not clearly define or address any practical application or how they would increase the multiplication efficiency, but rather the claims just merely disclose two types of multipliers structured as single package. These claims further preempt any algorithm or device having the two types of multipliers. Even though, the specification defines the practical application of the claimed invention, but the defined practical application does not exist in the claim and it is not the only practical application in the specification. With respect to claims 55-68, these

claims are written unclear whether software is embodied in medium or vice versa.

Further, the specification defines in page 15 lines 15-18 the medium can be data signal medium as non-tangible medium.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
